

How the World's Population Grew Across Continents (1970-2020)

"Asia surged past 4B, Africa's population took off, and Europe stagnated—while the Americas grew steadily, and Oceania remained the smallest."

"As **Africa rises**, **Asia stabilizes**, and other continents grow at different paces—how will the **world's population** landscape **evolve** in the coming decades?"

"1990: Africa's acceleration begins"

"2000: Asia crosses 3B"

"Europe's population growth **remains slow**."

"The Americas saw **steady** but slower growth."

"Africa's rapid rise continues, expected to surpass **2B** by **2050**."
